Disclaimer

This is the first release of the font. While every effort has been made to ensure quality, you may encounter imperfections. Ongoing updates and improvements are planned.

About

Bivacco is a display font inspired by the architecture of alpine bivouacs and mountain shelters. Drawing from their compact forms, structural logic, and distinctive silhouettes, it transforms architectural principles into a typographic language. The design explores the tension between angular constructions and smooth transitions, pairing sharp diagonal cuts with softer, more organic curves. Rooted in geometry yet defined by expressive details, Bivacco balances clarity, functionality, and character.

Concept

The project began by documenting and comparing a range of bivouacs, examining how their forms respond to environmental constraints through compactness, efficiency, and structural clarity. Through a process of abstraction, these observations evolved into a set of typographic principles. Particular attention was given to the sharp diagonal incisions found in several contemporary bivouacs, which were reinterpreted as cuts into the letter strokes and became a defining feature of the typeface. The resulting design does not imitate architecture directly; instead, it captures the essence of these structures, translating their proportions, and construction logic into typography.

- Monte Bianco (4.810 m)
- Monte Rosa (4.634 m)
- Cervino (4.478 m)
- Gran Paradiso (4.061 m)
- Piz Bernina (4.049 m)
- Ortles (3.899 m)
- Monviso (3.842 m)

The small train leaving Innsbruck is filled with backpacks and people checking weather apps before losing signal somewhere in the mountains. The city gradually disappears behind the trees and the landscape changes: narrow valleys, small stations surrounded by forests and steep rock walls.

As the elevation increases, clearings open unexpectedly between the trees, revealing distant peaks and traces of old mountain paths crossing the slopes. Hikers spread out along the trail, some moving quickly, others stopping to drink, check a map.

Higher up, near the huts, the air becomes colder and quieter. People gather outside the refuges, sitting on benches, sharing food, and exchanging information about routes and conditions. Here, between the valley below and the peaks above, the journey briefly slows down.
